Set of Criteria for Responsible Practices

1. Strategy

Criteria to assess the organization's long-term goals, alignment with responsibility, and focus on stakeholders:

- **Integration of Sustainability into Core Strategy**: Does the organization embed sustainability as a long-term priority?
  Weight: 30% (Key to long-term success and impact)
- **Stakeholder-Centric Decision-Making**: How well does the organization consider the needs of employees, customers, suppliers, and communities in its strategy?
  Weight: 25%
- **Accountability and Transparency**: Does the organization regularly publish transparent reports about its performance and goals related to responsibility?
  Weight: 20%
- **Innovation in Responsibility**: Does the organization actively innovate to create more responsible products, services, or processes?
  Weight: 15%
- **Alignment with Global Standards**: Does the strategy align with global frameworks like the UN SDGs (Sustainable Development Goals)?
  Weight: 10%

2. Structure

Criteria to evaluate how organizational systems, processes, and governance support responsibility:

- **Governance Oversight of Responsibility**: Is there a dedicated board committee or leadership team accountable for responsibility goals?
  Weight: 30%
- **Integration of Responsibility in Operations**: Are sustainability and responsibility integrated into everyday operations across all departments?
  Weight: 25%
- **Resource Allocation for Responsibility Goals**: Are adequate resources (financial, human, technological) dedicated to achieving responsibility objectives?
  Weight: 25%
- **Measurement Systems**: Does the organization use KPIs or metrics to track progress on responsibility initiatives?
  Weight: 20%

3. Culture

Criteria to assess organizational behaviors, values, and employee engagement:

- **Employee Awareness and Engagement**: Are employees aware of and involved in the organization's responsibility practices?
  Weight: 35% (Culture transformation starts with the workforce)
- **Leadership Commitment**: Are leaders visibly committed to and involved in fostering a responsible culture?
  Weight: 30%
- **Diversity, Equity, and Inclusion (DEI)**: Does the organization actively promote DEI within its workforce and leadership?
  Weight: 20%
- **Internal Communication of Responsibility Goals**: How effectively does the organization communicate its responsibility goals internally?
  Weight: 15%

4. Purpose

Criteria to evaluate the alignment of organizational goals with societal and environmental well-being:

- **Clear and Inspiring Purpose Statement**: Does the organization articulate a purpose that addresses societal and environmental challenges?
  Weight: 40% (Purpose guides everything else)
- **Alignment of Purpose and Operations**: Are the organization's operations, products, and services aligned with its stated purpose?
  Weight: 30%
- **Contribution to People and Planet**: Does the organization make measurable contributions to societal and environmental well-being?
  Weight: 20%
- **Historical Footprint**: Does the organization acknowledge its historical negative impacts and outline plans to mitigate them?
  Weight: 10%

Most Impactful Criteria Across Dimensions

- Clear and Inspiring Purpose Statement (40%): Purpose drives the organization's overall direction and alignment with responsibility.
- Employee Awareness and Engagement (35%): Culture starts with empowered employees who embody the organization's values.
- Governance Oversight of Responsibility (30%): A strong governance structure ensures accountability at the top levels of the organization.
- Integration of Sustainability into Core Strategy (30%): Embedding sustainability into the core strategy ensures lasting impact.
